

The Teys Grasslands program is a PIC-based accreditation program that encompasses producers that raise their cattle under the following principles:

- Have only grazed open pastures and been fed approved supplements
- Have never ever been fed grain or grain by-products or ionophores (for example rumensin/monensin)
- Are free from treatment with HGP's and/or antibiotics
- Have only been confined for animal husbandry and management practices (max. 20 days/year)
- For any purchased cattle, they must be vendor bred (first sale of their life) and accompanied by an LPA NVD & Grasslands Non-Accredited Vendor Declaration upon purchase
- Are raised in accordance with the Australian Animal Welfare Standard and Guidelines for Cattle

Numerous Grasslands accredited producers purchase cattle so that they can market into this program. **If your cattle are vendor bred and meet the requirements as listed above, please complete and sign a Grasslands Non-Accredited Declaration and consign along with your LPA NVD to the sale.** If you have any queries regarding the program requirements, please do not hesitate to contact your local Teys Livestock buyer or office.
