CATTLE TICK INSPECTIONS

RECOMMENDED CATTLE TICK PRETREATMENT GUIDE

OPTION 1

Plunge Dipping or Spraying Methods

For plunge dips, it is extremely important that your dip is at the recommended strength of .025%

1st Treatment

Pour on or Injectable 42-50 days prior to the sale date

2nd Treatment

Plunge dip or spray 13-17 days prior to the inspection date

3rd Treatment

Plunge dip or spray 4-7 days prior to the inspection date

OPTION 2

Pour On or Injectable Treatment

1st Treatment

30-34 days prior to sale date

2nd Treatment

6-9 days prior to the inspection date

Please ensure that the treatment intervals are in compliance with the label for that particular chemical.

INSPECTION FEES

Minimum Charge \$33.00 inc GST (1-22 head)

Over 22 head \$1.50 inc GST per head

(if cattle ticks are found the above fees still apply)

Cattle tick inspections will only be completed on the Wednesday and Thursday prior to the sale on the Friday, during daylight hours. The last pre treatment needs to be within the mandatory dates, if they don't fall within the dates cattle will not be inspected.
